

MAN DOWN PENDANT

BENEFITS

- Give your worker peace of mind knowing that help is only a button press away
- No fumbling with small key pads or multiple button sequences during an emergency
- Avoid unreliable and expensive buddy systems
- Adhere to worker safety policy
- Alleviate company and family safety worries

FEATURES

- Intrinsically Safe
- User worn (lanyard or hip holster)
- Large single emergency button
- Integrated motion sensor prompts alarm notification when pendant is motionless for 60 seconds
- LED lights, audible buzzer and vibrate function for tactile feedback

HOW IT WORKS

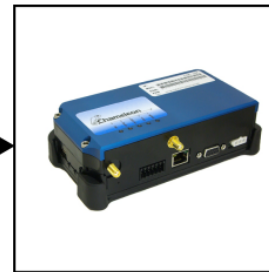

- The Intrinsically Safe pendant works in conjunction with a Gateway.
- The Windshield Gateway communicates with a Chameleon Modem or other wireless data communication equipment.
- The rugged Chameleon Modem installs into a worker's vehicle.
- Information such as GPS location and driver ID can be received and requested through a monitoring software program on your computer.
